Digitally Transforming LOTO

Smart Loto System

LACK OF AUDIT DOCUMENTS

PROBLEM

Current IOTO standard and process lacks auditing of lock tag in and out process.

LACK OF COMMUNICATION

**Smart
Loto
System**

Isolators, permit issuer and intended recipients are unaware of current status of isolation

ENERGY SOURCES

Energy sources are not well defined for safety instructions, number of locks required for isolations, permit status

i-LOCK

Smart Loto System

Solution

i Lock is the world's most advanced lockout procedures management system built to improve safety and productivity

i-LOCK

Smart Loto System

Add Users

I Lock enables features to add users like isolator, technicians.

Add Machine

Energy sources can be identified and be listed along with safety instructions.

Add Permit

I Lock issues permit digitally via web and mobile app.

i-LOCK

Smart Loto System

SMART LOCKS

With **ILOCK** our rugged smart locks are used to physically secure isolated energy. To protect workers, smart Loto uses a digital lock. A worker's digital Key in the form of OTP prevents secured smart lock from being unlocked. Only when every worker has shared his/her OTP the smart lock is opened to re-energize equipment.

i-LOCK

Smart Loto System

CLOUD-BASED

ILOCK uses real-time cloud-based communication to improve safety and productivity while working to reduce the occurrence and impact of human error. ILOCK gives you real-time awareness and insight into all ongoing activities from anywhere in the world.

i-LOCK

Smart Loto System

SAFETY-EFFECTIVENESS

Innovate your safety & effectiveness to empower your teams to deliver operational excellence
